They were eating breakfast.

ASSESSMENT

- Multi-dimensional platform
- Real-time interactive exercises and questions
- 3-Dimensional evaluation engine
- Real-time evaluation and detailed reporting to any location
- Automatic generated intervention learning schedule for student remediation
- Continuous monitoring and reporting of student progress
- Different teaching methodologies available to the teacher and student

Independent learning section as part of an exercise lesson or as a stand-alone tool to introduce different learning topics to individual students

The system will deliver individualized learning within set boundaries working with the remedial and gifted student at the same time in the same class

The solution uses limited multiple-choice as an exercise format as this encourages the student to guess;

The system is designed around the principles of individualized learning, giving the teacher the ability to set specific teaching schedules for each student in the class.

Intelligent Instruction

The solution incorporates the information from the diagnostic assessment and will tutor the student back to grade-level proficiency with the designed IEP (Individualized Education Plan). In the intelligent tutorial module the solution will make use of a range of different tools to instruct, test, review and teach the student. Below is an example of how the solution will then design an individualized lesson intervention plan for each student.

45. Quotation Marks
46. Comprehension

Step by step the IG3 English Literacy Solution uses the best way of instructing the student by going back to the basic level to determine at what stage the student really understands how the particular question is solved. When the program assesses and determines the students level of understanding of each subcategory, the software then generates multiple and random questions and instructions to build the students' knowledge to the grade level selected and beyond.
