

# EduTouch Unify

## Smart Device Management for Schools & Corporate Organisations

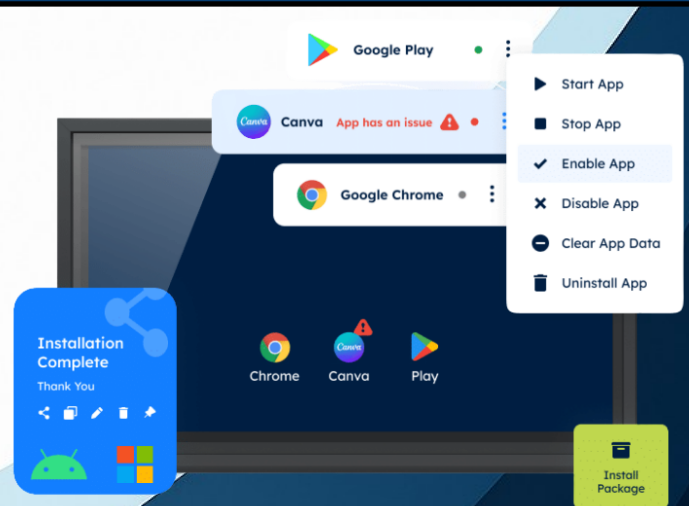

EduTouch Unify provides both educational institutions and corporate organisations with a powerful, centralised platform to manage all devices with ease.

Designed to support Windows, Android and ChromeOS environments, it gives IT teams the confidence, visibility and control needed to keep classrooms, offices and distributed teams operating smoothly.

Whether you're managing interactive panels, staff laptops, student devices, meeting room displays or mobile fleets, EduTouch Unify streamlines operations, increases security and ensures every device is ready when it's needed.

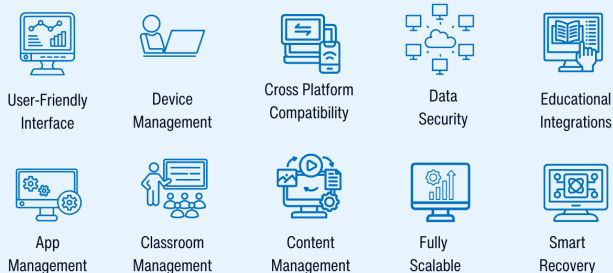

Your school or organisation receives a complimentary 12-month subscription with each EduTouch panel purchased, giving you full access to the platform's features from day one.

## Why Schools & Organisations Choose EduTouch Unify?

EduTouch Unify is built to simplify device management while supporting both IT teams and end-users -teachers, administrators, corporate staff and distributed teams. It enhances security, improves reliability and ensures a consistent experience across every device and location.

## Key Benefits

### 1. One Platform for Every Device

Manage panels, laptops, tablets and displays from one central dashboard, reducing complexity and improving consistency.

### 2. Works Across All Major Operating Systems

Supports Windows, Android and ChromeOS, making mixed device environments easy to manage.

### 3. Strong Focus on Data Security

Built-in security features help protect student, staff and organisational data.

### 4. Designed for Education & Corporate Use

Flexible tools support classrooms, offices and meeting spaces, keeping users focused and productive..

### 5. SmartRecovery for Minimum Downtime

Quickly restores devices to a reliable preset state, minimising disruptions.

### 6. Easy App Deployment & Management

Install, update or block apps across all devices while maintaining privacy and security.

### 7. Scalable for Any Size Organisation

Easily scales from single sites to multi-campus or distributed environments.

### 8. Simple, User-Friendly Interface

An intuitive single-pane-of-glass view reduces IT workload and speeds up support.

## Perfect for Schools & Organisations Wanting to:

- Improve reliability of devices in classrooms, offices and meeting spaces
- Strengthen digital safety and security
- Reduce IT workload and manual maintenance
- Manage mixed-device fleets more efficiently
- Support teachers and staff with better device control
- Standardise settings across all locations or departments
